

Dr. Lisa Davison

Session Time: 10:30 AM – 11:00 AM

Presentation: *“Thinking Outside the Box: Treating Complex Cases with Clear Aligners”*

Synopsis: Dr. Lisa Davison will share her clinical strategies when approaching her patients' customized aligner treatment design using 3M™ Clarity™ Aligners, establishing protocols, attachment designs and review complex clinical cases.

Objectives:

- Understand treatment planning, attachment placement, refinements, and case management.
- Review several complex clinical cases.

Biography:

Dr. Lisa Davison is a board-certified orthodontist practicing in Columbus, Ohio, where she opened her private practice in 2014. She completed her dental training at NYU College of Dentistry and her orthodontic residency at Jacksonville University School of Orthodontics. She is passionate about the latest advances in orthodontic and dentistry, practice management and team development. She prides herself on providing her patients with exceptional care utilizing technology such as digital scanning and 3d printing. Dr. Davison's special interests lie in treating complex inter-disciplinary and surgical cases. She is actively involved with several study clubs including her local Spear and Seattle study groups. She truly enjoys the challenges of treating these cases and amazing outcomes from working together as a team with her colleagues. Outside of practice, you will find her enjoying all things outdoors with her husband and two children.
